Maransi Street RT 01 RW 05 Air Pacah, Padang 25176

SUMMARY

I'm Jamil Febrian, an Electronic Engineering graduate from Padang State University with extensive experience in designing and developing electronic systems and technologies. Skilled in PCB design, signal processing, web and Android development, robotics, and IoT programming, I am passionate about solving complex problems in robotics, networking, electronics, and software development

EDUCATION

Padang State University - Padang, Indonesia

Aug 2019 - Mar 2024

Bachelor of Electronic Engineering Education, GPA 3.34

Thesis : *Automatic pesticide spraying control system using UAV Hexacopter drone*

ORGANIZATION EXPERIENCE

Robotic UNP

Jan 2022 - Jan 2023

Head of Division VTOL Flying Robot Team

- Led a robotics team specializing in Vertical Take-Off and Landing (VTOL) aerial robotics, overseeing project coordination, technical development, and team performance.
- Conducted research and development in VTOL flying robot technology, focusing on innovation, system design, and technological advancement.
- Designed and delivered technical training programs for VTOL research team members to enhance expertise, operational readiness, and project execution.
- Represented the team in the Indonesian Flying Robot Contest, competing in the Vertical Take-Off and Landing (VTOL) Division

PROFESSIONAL EXPERIENCE

PT Karlin Mastrindo

Jan 2025 - Des 2025

Manage Service BRIBOX Technician, Contract

Batusangkar, West Sumatera

- Performed maintenance and repair of computer and printer equipment across BRI Bank units in the Batusangkar and Payakumbuh areas, and also ensuring optimal operational performance.
- Conducted inspections, preventive maintenance, and servicing of Uninterruptible Power Supply (UPS) systems in server rooms across BRI Bank units in the Batusangkar and Payakumbuh areas to maintain system reliability and power stability.
- Diagnosed, troubleshoot, and resolved hardware malfunctions involving computer and printer equipment across BRI Bank units, minimizing downtime and supporting uninterrupted business operations

Project Frelance

Sep 2024

Electrical Installation, Freelance

Padang, West Sumatera

- Designed and installed residential electrical systems, ensuring safe, efficient, and standards-compliant electrical distribution.
- Installed switches and power outlets as part of residential electrical installations, ensuring proper functionality, safety, and user convenience.
- Performed the installation and configuration of Miniature Circuit Breakers (MCB) to provide reliable circuit protection and electrical safety.

Padang State University**Jan 2024 - Dec 2024****Assistant Lecturer, Freelance***Padang, West Sumatera*

- Assisted lecturers in supervising and guiding student projects related to engineering technology and electronic systems, ensuring effective project development and technical accuracy.
- Supported lecturers in research and development activities within the field of electronics technology, contributing to innovation, experimentation, and technical implementation.
- Provided academic and technical assistance during laboratory sessions, helping students understand practical concepts, equipment operation, and engineering methodologies.

PT PLN UP2D Sumbar**Apr 2023 - Mei 2023****SCADA Engineer, Intern***Padang, West Sumatera*

- Monitored power outage events across the West Sumatra region to support reliable electrical distribution and system performance analysis.
- Assisted in the installation and configuration of protection relays and Remote Terminal Units (RTUs) on switchgear systems to enhance operational safety and automation.
- Supported the integration of protection relays and RTUs into the SCADA system within the operational workspace, contributing to efficient monitoring, control, and power system management.

MAN 2 Padang**Jan 2023 - Jun 2023****Robotic Mentor, Freelance***Padang, West Sumatera*

- Supported students in understanding advancements in robotics technology through hands-on projects involving sumo robots and line follower robots, enhancing both technical knowledge and practical skills.
- Guided and facilitated students in preparing for and participating in high school-level robotics competitions, fostering innovation, teamwork, and competitive achievement

SDIT ADZKIA 2 Padang**Jul 2022 - Jun 2024****Robotic Mentor, Freelance***Padang, West Sumatera*

- Guided students in designing and developing mobile robotics projects, fostering practical engineering skills, creativity, and innovation.
- Guided students in learning robotics technology by providing technical knowledge, hands-on experience, and foundational understanding of robotic systems.

Minang Techno**Jul 2022 - Sep 2025****Embedded System Engineer, Freelance***Padang, West Sumatera*

- Provided professional services in electronic project development and automation systems based on Internet of Things (IoT) technology, delivering innovative and customized engineering solutions.
- Designed and developed 3D models, PCB layouts, web-based applications, control systems, and IoT programming solutions to support end-to-end technology project implementation.
- Engineered and integrated hardware-software systems by combining electronics design, automation, control systems, and IoT technologies

SKILL

Back-End Development:

- Proficient in PHP, Python, JavaScript, C/C++, Golang, and MySQL for developing scalable server-side applications, system integrations, and database-driven solutions.

Front-End Development:

- Skilled in HTML, CSS, Bootstrap, and Tailwind CSS for creating responsive, user-friendly, and visually optimized web interfaces.

Embedded Systems Development:

- Experienced in programming and system integration using Arduino, ESP32, ESP8266, Raspberry Pi, STM32, MQTT, and HTTP for IoT, automation, and hardware-based applications.

Web Frameworks & Software Development:

- Competent in CodeIgniter, Laravel, Django, React.js, and Vue.js for full-stack web application development and modern software solutions.

Electronics Design & Simulation:

- Experienced in electronic circuit design, PCB development, and system simulation using Autodesk EAGLE, Proteus, Fritzing, and SimulIDE.

Networking & Technical Installation:

- Skilled in computer hardware installation, LAN infrastructure setup, and electrical installation to support reliable system connectivity and operational efficiency.

PERSONALITY SKILL

- Leadership
- Fast Learning
- Critical Thinking
- Analytical Thinking
- Creative
- Innovative
- Problem Solving
- Team work

LANGUAGE

- Indonesia
- English
